

Weed, New Mexico

For nine years there has been an aching void for the scenes of my childhood and the old folks as well as the young at home, this feeling has been partially arrested by the weekly visits of the Herald, but for some cause it ceases to come. Find enclosed the price of another two years, treatment for this terrible malady.

I am on the Sacramento Mountains in New Mexico about half way between Roswell, N. Mex. and El Paso Texas and enjoy the pleasures of high living as the altitude is about 10,000 feet above sea level.

Stock raising is the principal occupation, but farming is a success where water can be had for irrigation. We have in the mountains fine springs of water, snow in the winter and rains in the summer, but the season is short and only certain crops such as barley, oats and Irish potatoes are to mature at this altitude.

For pure air and water, delightful scenery, easy living generally where health is almost guaranteed same is true as to a living if such conditions appeal to any of my old countrymen write me for further information, actually a practising physician has to gamble in connection with his profession to make a decent living.

What am I doing? I have 320 acres of fine farming and grazing land leased for five years on which I grow oats, barley and potatoes. I have all necessary farming tools and machinery to cultivate and harvest my crops, were it not thus woe would be me as I am about 8 miles from a settlement and a mountain road; in connection with farming I have some stock—horses, cattle, hogs and chickens, but no woman. I have a telephone which has some of the qualities of a woman, viz: talking and electricity.

I spent my school days at Mt. Zion, Lee Seminary, Lone Oak and in the Yeargan Select School at Cookeville.

Pleasant Grove, Utah

Dear Editor: I thought I would write a short letter, seeing that a few of my friends in Tennessee have been writing.

I was born and raised in Tennessee, and came here eight years ago; I stayed here four years and went back to Tennessee with the expectance to live there, but I stayed only about six months and came back to Utah. I like Tennessee, but I like Utah better.

I have a nice home in Pleasant Grove and think it a nice town to live in.

We have two schoolhouses and are building another at the cost of \$35,000.

We have a nice church which cost about \$50,000.

Pavements are being put in this summer which will cost about \$25,000 I think.

Pleasant Grove is one of the healthiest towns in the country for we have snow-capped mountains surrounding us.

Jack Frost has visited us this year and has done considerable damage to the fruit, but not so bad as people thought at first.

Matthew Matheney, I would like to read another letter from you, for you used to be my school teacher.

I wonder what has become of Elijah Chapin of Oklahoma for I have not heard from him for a long time. D. C. JUDD.

Olga

I have been back from New Mexico two weeks ago and am getting along very well. Have had several meals of hog jaw and poke salad and squirrel most every meal.

Arvel Billbrey of Panhandle, Texas, tell us through the Herald what the prospects are for a good crop.

I took dinner with Millard Billbrey the other day.

A Platform of Store Principles

The platform of a political party is a statement to the people of what the party proposes to do; it's the "reason why" you are asked to endorse it.

Here's the platform we've laid down for our store business; it's a promise now; it will be a fulfillment later—to you as soon as you come here and vote yourself into line with our host of satisfied customers.

Plank I. The best Shoes, Clothing, Hats, Dry Goods, Ladies' and Gents' Furnishings sold anywhere at the price.

Plank II. Furniture, the good, substantial, well constructed kind at prices within reach of all.

Plank III. Stoves and Ranges, the Monogram and Princess line. New and exclusive features not found in any others. Yet they cost no more.

Plank IV. An assortment so complete in each department that it will be easy to get just what you want when you want it.

Plank V. Courtesy in serving you so that if

you are a millionaire or a laborer you will feel that we are more interested in pleasing you than in getting your money.

This is the progressive platform upon which we do business together. We can neither of us afford to deal on any other basis.

Now just a personal word; we've been in the goods business a good many years. We know every detail of it; have carefully studied it from every point of view—yours as well as ours. As the result we've come to this conclusion—it's a conviction. Unless you are in the habit of carefully comparing, side by side, every article you buy from the different stores, with the price you pay for each, you'll never know where it is your dollars are doing the most good. Compare our goods with others of the same price. Note the difference in quality. We will then do more business together in the future. Yours for a square deal and a fair count.

P. M. SMITH
